- Code Academy
  Full-stack Development
  Honor Diploma Recipient with 93 GPA
  09/2022 - 02/2023

- Azerbaijan Technical University
  Bachelor of Computer Engineering
  09/2019 - 02/2023

About Me

I am a dynamic and passionate FullStack Developer based in Baku, Azerbaijan. With a strong background in Node.js and React, I bring a blend of technical expertise and creative problem-solving to every project.
My journey in the world of programming has been fueled by a deep curiosity about the intricacies of technology. I thrive in collaborative environments, where I can leverage my skills to create innovative and efficient solutions.

My goal is to ascend to the pinnacle of my career by continually expanding my skill set and contributing to projects that push the boundaries of what technology can achieve. I am excited about the prospect of bringing my passion and expertise to a team that shares a commitment to excellence.

Professional Experience

Kapital Bank | Software Quality Assurance Engineer
04/2024 - current

Key responsibilities:
- **Developing Automated Test Scripts**: Utilized Selenium WebDriver and Cucumber framework to develop robust automated test scripts for web applications, ensuring thorough coverage of functional and regression testing.
- **Creating Test Scenarios**: Collaborated with cross-functional teams to define and document test scenarios using Gherkin syntax, ensuring alignment with business requirements and user stories.
- **Maintaining Test Framework**: Maintained and enhanced the Selenium-Cucumber test framework, including creating reusable step definitions, page objects, and utility functions, to improve test efficiency and maintainability.
- **Cross-functional Collaboration:** Collaborated with product managers, developers, and quality assurance teams to understand requirements, provide feedback on user stories, and ensure the delivery of high-quality software products.

Agamira | Frontend Developer | Kyiv, Ukraine (Remote)
08/2023 - 01/2024

Key responsibilities:
- Building AI-Integrated web applications
- SEO optimization
- Adaptive and Responsive design.
- Learning and applying new libraries, frameworks in a short time
- Close cooperation with colleagues

Azerbaijan Aero-cosmic Agency | Frontend Developer
02/2023 – 07/2023

Key responsibilities:
- Building SPA with React js.
- Researched and tracked new web technologies to enhance applications.
- Adaptive and Responsive design.
- Working with REST API.
